NEBOSH Level 6 International Diploma for Occupational Health and Safety Management Professionals

The **NEBOSH Level 6 Diploma for Occupational Health and Safety Management Professionals** stands as a sophisticated qualification within the health and safety sector. This elevated course delivers a comprehensive insight into the management of occupational safety and health. As of May 2023, the syllabus has undergone a revision to the latest iteration, referred to as the NEBOSH Level 6 Diploma.

Entry requirements

- ➔ **Fundamental Understanding:** Candidates must have a basic grasp of health and safety concepts.
- ➔ **Knowledge of Principles:** Proficiency in core health and safety principles such as risk evaluation, incident investigation, and an understanding of health and safety legislation.
- ➔ **Writing and Analytical Skills:** Strong writing abilities and the capacity to critically analyze information are required.
- ➔ **Prior Education or Experience:** Completion of the NEBOSH General Certificate or a minimum of 5 years of experience in a health and safety role is highly recommended. This ensures readiness for the advanced course content.

What will you learn?

Information Management and Communication:

- Source, assess, and convey health and safety information effectively.
- Foster a positive safety culture and influence behavioral change.

Organizational Competence and Risk Management:

- Evaluate and enhance health and safety competence at individual and organizational levels.
- Master risk management, including hazard identification and risk assessments.

Monitoring and Strategic Development:

- Establish and oversee health and safety monitoring systems.
- Formulate comprehensive health and safety strategies.

Legal and Contractual Obligations:

- Participate in health and safety legal matters.
- Manage compliance within contracts and supply chains.

Workplace Health and Safety Advisory:

- Provide strategic advice on workplace health and safety issues.
- Guide on assessment, control, and legal aspects of workplace hazards.

Course structure

COURSE UNITS	LEARNING HOURS	ASSESSMENT HOURS	ASSESSMENT TYPE
Unit 1: Workplace Health and Safety Principles	135	40	Assessment

NEBOSH Health and Safety at Work Award

The **NEBOSH Health and Safety at Work** qualification serves as a foundational course for employees requiring a grasp of health and safety principles within their job functions. It includes training on conducting risk assessments and managing typical hazards encountered in the workplace.

Who is the course for?

Staff who need to understand the principles of health and safety as part of their role, including team leaders, supervisors, HR professionals and facilities managers.

Training Benefits

Enhanced Safety in the Workplace: The NEBOSH Health and Safety at Work qualification equips your employees with the necessary knowledge to minimize accidents, thereby reducing expenses, safeguarding your business's reputation, and preventing legal issues.

Confidence in Operational Safety: Rest assured that your team operates safely and competently, a factor that can contribute to meeting established standards and securing new clients.

Value from Training: Your workforce will gain practical abilities that provide tangible benefits to your business. This qualification assesses practical skills directly within your workplace, ensuring immediate application of their learning.

What will you learn?

The program encompasses fundamental principles and procedures of health and safety vital for workplace implementation. Key aspects include:

- Grasping the concepts of risk assessments and management tactics
- Implementing these tactics to manage typical workplace dangers, such as those related to fire, electrical safety, transportation, and manual labor tasks

Introduce your staff to health and safety, reduce accidents, and control costs.

Training material delivered by our business partner Astutis LP807

Course Key Facts Duration:

23 hours for Online learning.

Three days for Classroom On-site or Virtual Classroom learning.

Unit HSA1

Workplace Safety Foundations

- The foundations of health and safety
- Risk assessment and control
- Hazards and controls: work equipment, electricity, manual handling, hazardous substances, working environment
- Transport safety
- Fire Safety

Unit HSA1

Assessment

This course is assessed with a workplace health and safety review for Unit HSA1.

NEBOSH HSE Introduction to Incident Investigation

This single-day course instructs participants on how to efficiently investigate straightforward incidents. Through identifying lessons and implementing enhancements, organizations can prevent the recurrence of similar events and enhance their overall safety record.

Who is the course for?

This course is for anyone who wants to carry out incident investigations effectively. Employers, supervisors, SHE champions, union and safety representatives will benefit.

What will you learn?

After finishing this course, learners will be equipped to:

- Grasp the reasons for conducting incident investigations and recognize the role of human and organizational elements in incidents.
- Learn the process of incident investigation and be able to conduct one with assurance.

Benefits for Employers

Having a workforce trained in proficiently investigating minor incidents equips your company with the knowledge to learn from past incidents and enhance future practices. The course will also cultivate a safety-first mindset within your organization by motivating staff to take an active role in investigating incidents. A well-informed staff will engage more deeply with the investigation process, leading to more comprehensive investigations and valuable insights gained.

Benefits for Learners

- Independently investigate simple incidents.
- Produce an action plan to prevent a reoccurrence of an incident.
- Positively impact the safety culture in their organisation.
- Gather evidence including witness interviews.
- Contribute to team investigations for large scale incidents.

Course Key Facts Duration:

1 day or 7 hours Course Content

INVI

Element 1: Understand why incident investigations are carried out and how human and organisational factors contribute to incidents.

Element 2: Understand how to investigate incidents and confidently carry out investigations.

Online Assessment

Online learners will be required to download the assessment template from the course content page inside the course, complete the assessment and send it to Astutis. The assessment can be either completed by hand or be typed.

Virtual Classroom Assessment

There is a practical assessment at the end of the course. Learners will be provided with a pack of evidence and shown a video of three witness interviews. They will be asked to review the evidence, evaluate the interviews and produce an action plan that will help prevent recurrence of an incident

NEBOSH HSE Award in Managing Risks and Risk Assessment at Work

The **NEBOSH HSE Award in Managing Risks and Risk Assessment at Work** is an entry-level one-day course that equips individuals with the skills to perform workplace risk assessments following the Health and Safety Executive's guidelines. It aims to improve an organization's ability to manage risks and enhance its safety protocols.

Who is the course for?

The course is designed for individuals tasked with managing health and safety risks and conducting risk assessments in the workplace, such as Managers, Supervisors, HSE Champions, and HSE Representatives. No prior knowledge or experience is needed.

Benefits for Employers

By undertaking the NEBOSH HSE Award in Managing Risk and Risk Assessment at Work, your organization will be able to adhere to the latest risk management standards and regulations, have valuable risk management knowledge in-house, maintain high workplace safety standards, and foster a secure and healthy work environment.

Benefits for Learners

Crafted through collaboration between NEBOSH and the UK's Health and Safety Executive (HSE), the course equips you to identify hazards, assess risks in low to medium risk settings, evaluate risk judiciously, and pinpoint effective control measures.

Course Key Facts Duration

Duration

This is available as a one day virtual classroom, traditional classroom or online course.

Taught hours: six hours

Assessment: one hour

Total hours: seven hours

What's covered?

Why manage health and safety risks: The reasons for managing health and safety risks including competence of those involved and the importance of consultation with relevant workers.

Managing risk: Identifying and understanding the risks Effectively manage risk, which will involve identification and understanding of risk potential.

Managing risk: Controlling the risk Effectively manage risk and understand its control.

Managing risk: Sources of information and the application of HSE risk assessment tools Where to find sources of information identify and manage risk, and the application of the HSE risk assessment tools. Assessment Learners must complete a risk assessment case study which identifies a range of hazards and meets best practice.

The NEBOSH IIRSM Certificate in Managing Risk

The **NEBOSH IIRSM Certificate in Managing Risk** is an ideal option for individuals aiming to develop the ability to recognize, assess, and handle risks within an organization, as well as comprehend the significance of risk management processes. It is especially suitable for risk management practitioners seeking to expand their understanding of risk beyond specific areas like health and safety, quality, or business continuity.

Who is the course for?

The NEBOSH IIRSM Certificate in Managing Risk is a perfect choice for anyone who wants to be able to identify, evaluate, and manage organisational risks and understand their impacts. It is particularly relevant for risk professionals looking to gain a broader view of risk beyond a specialism such as health and safety, quality, or business continuity.

What will I learn?

By studying this qualification, you will learn:

- The principles of risk and risk management
- The risk management process and framework based on ISO 31000
- The relationship between psychology and decision-making
- How to analyse the environment in which an organisation operates, identifying potential risks and opportunities
- The relationship between risk management, business continuity, crisis management and organisational resilience

How will it help me?

- **Expand your expertise** – obtain a broad understanding of risk and its management, advantageous if your current specialization is in a specific risk area like health and safety.
- **Versatile abilities** – the competencies acquired are applicable across various organizations, sectors, and roles globally.
- **Career growth** – your educational pursuits will enhance your risk management abilities, which are sought after in the marketplace.
- **Acknowledgment** – upon completion, you'll qualify to become an Associate member of IIRSM with a reduced fee for the initial year.

IOSH Safety for Executives and Directors

The **IOSH Safety for Executives and Directors Online** course equips CEOs and Directors with comprehensive knowledge of their health and safety duties, highlighting the ethical, legal, and financial advantages of active engagement in safety, health, and risk management practices.

Who is the course for?

This course is tailored for individuals in senior executive or director positions who wish to enhance their understanding of health and safety principles. It aims to equip these eager learners with the necessary protocols and knowledge to effectively lead and influence any organization.

Benefits for Learners

- Grasp your obligations regarding health and safety in the workplace.
- Acknowledge the significance of incorporating health and safety goals and strategies.
- Facilitate the comparison of your performance against others and discern best practices from comparable businesses.
- Define your vision for health and safety and determine the steps to realize it.

Benefits for Employers

- Rest assured that your top-tier employees possess a thorough knowledge of safe management practices.
- Foster enhancements in productivity, elevate profitability, and instigate cultural transformation.
- Elevate your brand's reputation through superior health and safety standards.

Course Key Facts

Duration: 4 hours recommended learning time, 2 hours optional self-study

Course Content

The course is structured around five key modules:

1. The moral, legal and financial case
2. Plan – planning for health and safety
3. Do – implementing health and safety
4. Check – monitoring health and safety performance
5. Act – improving health and safety performance

Assessment

It involves a personal commitment (action plan) relating to the learning on the course. Identify three actions that you commit to taking in your workplace appropriate to your level of responsibility. On successful completion of the action plan, you will receive an official IOSH digital certificate.

IEMA Sustainability Skills for Managers

Designed specifically for Managers, Supervisors, Contractors, and Team Leaders, this program doesn't aim to make them environmental experts but rather to educate them about the legal, natural, and environmental management obligations that impact your business. Participants will acquire practical skills that are necessary to fulfill these duties and enhance the sustainability performance of the organization

Course Structure

IEMA Sustainability Skills for Managers expands upon the information presented in the Sustainability Skills for the Workforce modules. This course delves deeper, equipping managers and supervisors with the knowledge and skills to enact change within their teams. It includes five additional modules, bringing the total to nine modules.

Module name	Learning hours	Assessment
Module 1: Risks & opportunities from environmental sustainability	14 hours	Online Exam
Module 2: Laws & other compliance obligations		
Module 3: Key environmental sustainability issues		
Module 4: Improving environmental sustainability performance		
Module 5: Control of emissions to air		
Module 6: Control of environmental noise		
Module 7: Control of contamination of water sources		
Module 8: Control of waste and land use		
Module 9: Sources and use of energy and energy efficiency		

Corporate Advantages:

- Substantial cost savings in energy, materials, and regulatory compliance.
- Reduced environmental impact.
- Compliance with ISO 14001 standards.
- Protection against risks like fines, criminal prosecution, and brand damage.

Fostering Innovation:

- Encourages innovative approaches in products, processes, and production.
- Enhances sustainability across the supply chain.
- Empowers employees to suggest sustainable practices.

Securing New Business Prospects:

- Improves stakeholder satisfaction, including customers, employees, and the public.
- Opens opportunities for market development and new business ventures.

IEMA Foundation Certificate in Environmental Management

The **IEMA Foundation Certificate** offers a foundational understanding of environmental management and sustainability. It is ideal for individuals interested in positively impacting the environment, especially those involved in environmental data collection, legislative compliance, and providing advice or support in small-scale projects. The course encompasses core, technical, and skill-based knowledge, focusing on global environmental challenges and their impact on businesses. Participants will learn management skills to combat climate change, weather extremes, resource limitations, energy issues, and regulatory concerns. The program also includes training on implementing recognized environmental systems like ISO 14001, enabling participants to make informed decisions and enhance workplace efficiency and improvements.

No Entry Requirements Needed!

What will you learn?

These learning outcomes cover 3 themes: core knowledge, technical knowledge, and knowledge of skills. Learning outcomes 1–6 make up the bulk of the learning hours. Learning outcomes 7–13 are included holistically throughout the delivery of the other learning outcomes.

Core Knowledge

- 1 – Outline the implications of global trends for the environment, for society, the economy, and organisations
- 2 – Outline sustainable business/governance principles and their relationship with organisations, products, and services

Technical Knowledge

- 3 – Outline environmental principles and their relationship with organisations, products, and services
- 4 – Outline major policy and legislation and their implications for organisations, products, and services
- 5 – Outline major tools, techniques, systems and practices used to improve sustainability performance
- 6 – Outline the role of innovation and other leading practices in developing sustainable products and services and providing sustainable solutions

Knowledge of Skills

- 7 – Collect data, perform analysis and evaluate information
- 8 – Research and plan to provide sustainable solutions
- 9 – Deliver effective communication methods and capture feedback
- 10 – Engage with stakeholders
- 11 Outline tools and techniques that identify opportunities and risks
- 12 – Identify and propose ways to improve performance
- 13 Support change and transformation to improve sustainability.

IEMA Pathways to Net Zero

The **IEMA Pathways to Net Zero** course is offered in two formats: a 2-day virtual training or a 10-hour online course. This course is designed to offer comprehensive and reliable guidance on addressing the climate crisis effectively. It targets supervisors and leaders, providing them with a strategic and operational perspective on environmental sustainability tailored to their specific industry and area of work. The concept of net zero is central to this course, focusing on achieving a balance between greenhouse gas emissions generated and those eliminated from the atmosphere. Participants will explore various strategies for both reducing current emissions and actively removing greenhouse gases.

Who is the course for?

This course is ideally suited for supervisors and managers across all sectors and has no formal entry requirements, however it is strongly preferred that the candidate is in a practicing role that will allow them to deeply understand the areas explored over the duration of the course.

Benefits for Employers

- Enhance the skills and capabilities required across the organization to devise a strategy and a roadmap towards attaining net zero goals.
- Formulate and execute a plan aimed at lowering emissions and exploring methods to enhance energy efficiency.
- Craft effective communication strategies to promote the business's commitment to offering goods and services with reduced carbon footprints.

Course Key Facts

Duration: 10-hour online course or 14-hour (2-day) guided learning hours

Assessment: Online 20 question multiple choice test

Upon finishing the course successful learners will be able to:

- Explain the concept of net zero and explain the UK and International policy context and drivers.
- Develop internal capacity for delivering net zero and explain the risks and opportunities of net zero including future business viability.
- Explain the main principles of greenhouse gas accounting and establish a net zero strategy.
- Develop your own business decarbonisation plan and examine the certification requirements for purchasing renewable energy.
- Understand the implications of reducing greenhouse emissions and how to collaborate with your supply chain on joint data collection, target setting and decarbonisation.
