

IOSH Approved Behavioural Science for Leadership in Safety

IOSH Approved Behavioural Science for Leadership in Safety course aims to reshape participants' behavior and that of their peers, promoting safety leadership through an understanding of behavioral principles.

Who is the course for?

This course is crafted for leaders, managers, and supervisors across all sectors, aiming to equip them with the knowledge to impact safety culture positively. It teaches how to effectively influence workplace behavior towards a proactive safety mindset.

The program encompasses six modules:

1. Leadership in Safety
2. Excellence and Avoiding Failure
3. Behavioral Drivers
4. Safety Performance and Behavioral Science
5. ABC Analysis
6. Setting Goals

Assessment

Participants are required to maintain a reflective journal throughout the course, culminating in a 40-minute, 12-question multiple-choice test. An automated result is provided post-submission of the test and journal, with official verification within 24 hours. A minimum score of 80% is necessary for passing.

Course Key Facts

Duration: 6–8 hours

Access:

Online format enables flexible completion, whether in a single session or over a few weeks, including the IOSH assessment.
