

# The NEBOSH Environmental Management Certificate

The **NEBOSH Environmental Management Certificate** is an internationally recognized qualification aimed at enhancing your understanding of environmental issues within the workplace. This certification is designed to equip you with the knowledge, tools, and skills necessary to implement effective environmental management systems, thereby minimizing your environmental footprint.

## Who is the course for?

It's ideal for:

- Health and Safety Managers
- Facilities Managers
- Quality Managers
- Operational Managers

## What will you learn?

Upon completing the course, you will be able to:

- Justify environmental management using ethical, legal, and financial arguments.
- Recognize workplace activities subject to environmental legislation.
- Understand and work within an environmental management system.
- Assess environmental aspects and impacts, identifying significant aspects and evaluating current controls.
- Support environmental emergency planning.
- Reduce environmental harm by identifying pollution sources and suggesting control measures.
- Manage waste responsibly and understand energy efficiency measures

## Course Key Facts

- **Qualification Level:** This certificate is a level-3 vocational qualification on the UK Regulated Qualification Framework (RQF) and Qualifications and Credit Framework (QCF), comparable to an A-level. In the Scottish Credit and Qualification Framework (SCQF), it is recognized as a level 6 with 7 credit points.
- **Study Requirements:** The course requires a total of 67 study hours, divided into 34 taught hours, 25 self-study hours, and 8 assessment hours

## Course Structure

- The course covers the following elements, each with designated learning and self-study hours:
- Foundations in Environmental Management (6 learning hours, 25 self-study hours)
- Environmental Management Systems (5 learning hours, 25 self-study hours)
- Environmental Impact Assessments (6 learning hours, 25 self-study hours)
- Planning for Environmental Emergencies (3 learning hours, 25 self-study hours)
- Control of Emissions to Air (2 learning hours, 25 self-study hours)
- Control of Environmental Noise (2 learning hours, 25 self-study hours)
- Control of Water Contamination (3 learning hours, 25 self-study hours)
- Waste and Land Use Management (4 learning hours, 25 self-study hours)
- Energy Sources and Efficiency (4 learning hours, 25 self-study hours)

## Assessment

The NEBOSH Environmental Management Certificate includes two assessments:

1. **Unit EMC1:** An open book exam completed online within 24 hours, involving a case study and task-based questions to test practical application of knowledge.
2. **Unit EMC2:** A practical risk assessment involving the identification and evaluation of environmental aspects and impacts in your workplace, based on ISO 14001:2015 standards. This assessment is divided into four stages: introduction, identification of aspects and impacts, significant aspects and recommendations, and communication and review.
