

ISEP Environmental Sustainability Skills for the Workforce

The ISEP Environmental Sustainability Skills for the Workforce is an ideal beginner course for those not specializing in environmental fields. This one-day program aims to offer a comprehensive understanding of environmental sustainability. It prepares participants with the necessary skills and knowledge to positively influence their organization's environmental performance while addressing stakeholder needs. The course, certified by IEMA, includes practical exercises and workshops, focusing on environmental risks and opportunities, compliance requirements, and critical sustainability topics.

Course Key Facts

- **Module 1:** Risks & Opportunities from Environmental Sustainability
- **Module 2:** Laws & Other Compliance Obligations.
- **Module 3:** Key Environmental Sustainability Issues.
- **Module 4:** Improving Environmental Sustainability Performance.
- **7 hours duration with an online exam.**

Who is the course for?

This course is designed for everyone in the workforce, from entry-level staff to top-level executives, providing an understanding of the challenges faced by your business. Participants will discover how their individual actions, along with the company's activities, impact global environmental, economic, and social matters. Additionally, they will gain knowledge of practical steps that can be taken to enhance sustainability performance at all levels

Course Overview

This course features several case studies to reinforce its main learning objectives, including examples from Greater Manchester Fire and Rescue Service focusing on climate change resilience, Hanson on landscape and biodiversity stewardship, and Kingston University on collaboration and communication. The course is structured into four modules:
