ISEP Sustainability Skills for Managers

Designed specifically for Managers, Supervisors, Contractors, and Team Leaders, this program doesn't aim to make them environmental experts but rather to educate them about the legal, natural, and environmental management obligations that impact your business. Participants will acquire practical skills that are necessary to fulfill these duties and enhance the sustainability performance of the organization

Course Structure

ISEP Sustainability Skills for Managers expands upon the information presented in the Sustainability Skills for the Workforce modules. This course delves deeper, equipping managers and supervisors with the knowledge and skills to enact change within their teams. It includes five additional modules, bringing the total to nine modules.

Module name	Learning hours	Assessment
Module 1: Risks & opportunities from environmental sustainability		
Module 2: Laws & other compliance obligations		
Module 3: Key environmental sustainability issues		
Module 4: Improving environmental sustainability performance	**14 hours**	**Online Exam**
Module 5: Control of emissions to air		
Module 6: Control of environmental noise		
Module 7: Control of contamination of water sources		
Module 8: Control of waste and land use		
Module 9: Sources and use of energy and energy efficiency
